

## **Electro Girl**

By Brooke Coulter

Once upon a time there was a girl named Lily Mosier, but she wasn't an ordinary girl. She was Electro Girl. In the day she is an ordinary girl who lives in Manassas, Virginia, but at night, she is Electro Girl.

She works at Northern Virginia Electric Cooperative (NOVEC) as an undercover superhero, along with all the other superheroes. They each have a town to protect. Electro Girl's town is Manassas, Virginia. Her dad is the CEO of NOVEC, and everyone knew his name, Brian Mosier. He helped new and old heroes find their way and told them where the monsters were.

One day when Lily was baking cookies, she received a distress signal. She dropped the whisk and put her shoes on. She had to go to NOVEC. When she got there, nobody else was. She could feel electricity charging up in her fingers. She rushed to the machine that put on her suit and pushed the button.

She ran out mumbling to herself, "Something isn't right. Usually there are hundreds of people here."

She was right, usually NOVEC was filled to the brim with inventors, superheroes, and monsters being taken to the end. The end was a portal that trapped the monster in an empty void. Suddenly, a huge beast crashed through the wall, her dad trying to stop it.

"Dad!" Lily yelled with confusion, "What are you doing?"

"I'm trying to stop the beast," he answered.

Lily rolled her eyes as she started running toward the beast. As she got closer to the beast, it turned around and she saw it was a cyclops! Cyclops haven't been seen in years. She closed her eyes and charged her powers to the max. When she opened her eyes, she struck the cyclops against the wall.

"Hey!" her dad scolded, "I almost had him."

Lily replied sarcastically, "Sorry! Can you help me?"

"I'll go rescue the others. Be right back," Brian told her as he ran through the hole in the wall.

Lily tried to hold back the cyclops for as long as she could. Just as she was about to give in, her dad showed up with all the heroes. They all struck the cyclops, but they soon learned that only electricity heroes can hurt it. All the electricity heroes stepped up, Electro Girl, Charged Up, Lightning Bolt, and Gauge. All together, they summoned their powers and delivered one final blow that knocked the cyclops out like a light.

It wasn't dead, but they still had to take care of him, so they threw him in the void. They knew that it would be able to get out because it was so big, so they closed the void. They closed it long enough that the cyclops would not be able to get out.

"Thump, thump."

"Did you hear that?" Electro Girl asked.

“I wonder what that is,” her dad replied.

All they knew was that it was coming.
