

## **I love electricity!**

One day when I was sleeping the lights are off! So I was very scared. So the electricity saved me! So I am happy because he saved me! So I am happier forever with electricity and when my mom was cooking the lights are off. My mom couldn't cook. So the electricity helps my mom. So my mom is happier forever with electricity too! When my dad working in his computer the lights are off! My dad was very scared and electricity saved my dad! So my dad and the electricity are happier forever!

One day when I was going to carnival the lights are on! So I was very very excited! Next day when I was playing with my mom in the night time the lights are off. So the electricity saved me! So I am very happier forever. Another day when I was dancing the sound level in the TV was very loud. So I am happier forever! So electricity helps me and my family and everybody! I love electricity and everybody loves electricity too!  
Hooray!!!
